DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-19 (each in part), drawn to a method of making an antibody which specifically binds MCP-1 receptor polypeptide wherein the polypeptide is **SEQ ID NO: 2**, classified in class 424, subclass 130.1, for example.
 - II. Claims 2-19 (each in part), drawn to a method of making an antibody which specifically binds MCP-1 receptor polypeptide wherein the polypeptide is **SEQ ID NO: 4**, classified in class 424, subclass 130.1, for example.
 - III. Claims 2-4 and 9-19 (each in part), drawn to a method of making an antibody which specifically binds MCP-1 receptor polypeptide wherein the polypeptide is a polypeptide encoded by an isolated nucleic acid comprising residues 40 through 1161 of the DNA sequence of **SEQ ID NO: 1**, classified in class 424, subclass 130.1, for example.
 - IV. Claims 2-4 and 9-19 (each in part), drawn to a method of making an antibody which specifically binds MCP-1 receptor polypeptide wherein the polypeptide is a polypeptide encoded by an isolated nucleic acid comprising residues 81 through 1160 of the DNA sequence of **SEQ ID NO: 3**, classified in class 424, subclass 130.1, for example.
2. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1647

3. Although there are no provisions under the section for "Relationship of Inventions" in M.P.E.P. § 806.05 for inventive Inventions that are directed to different methods, restriction is deemed to be proper because these methods appear to constitute patentably distinct inventions for the following reasons: Inventions I, II, III, and IV are directed to methods that are distinct both physically and functionally, and are not required one for the other. Invention I requires search and consideration of *SEQ ID NO: 2*, which is not required by any of the other Inventions. Invention II requires search and consideration of *SEQ ID NO: 4*, which is not required by any of the other Inventions. Invention III requires search and consideration of *SEQ ID NO: 1*, which is not required by any of the other Inventions. Invention IV requires search and consideration of *SEQ ID NO: 3*, which is not required by any of the other Inventions.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and/or different classification, restriction for examination purposes as indicated is proper.
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
